

1. Download SU from: <https://github.com/JohnWStockwellJr/SeisUnix> and *Install_SU.sh* from: https://github.com/cui-xiaoang96/Install_SeismicUnix-SU-
2. Extract the SU in the location as shown in the figure, and the *Install_SU.sh* in the same location.

3. Modify the script content. Replace the location shown below with your account name.

```
echo "export CWPROOT=/home/su/SeismicUnix" >> ~/.bashrc
echo "export PATH=$PATH:/home/su/SeismicUnix/bin" >> ~/.bashrc
```

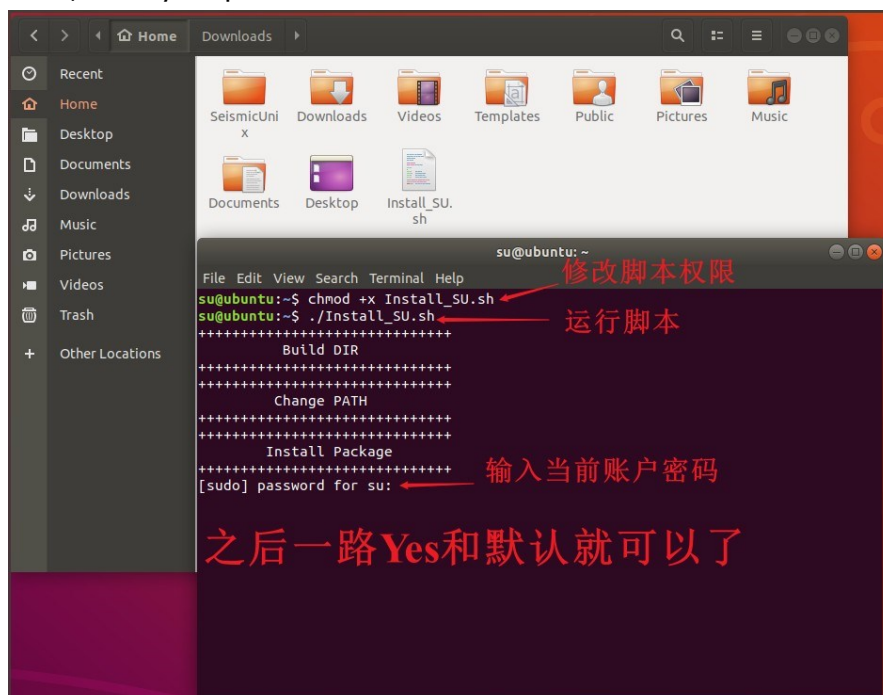

方框内修改为你的账户名

4. Open the terminal on the desktop and execute the following two commands:

chmod +x Install_SU.sh

./Install_SU.sh

Then, enter your password.

5. When the below figure is outputted, SU has been installed.
