1. Download SU from: https://github.com/JohnWStockwellJr/SeisUnix and *Install_SU.sh* from: https://github.com/cui-xiaoang96/Install_SeismicUnix-SU-
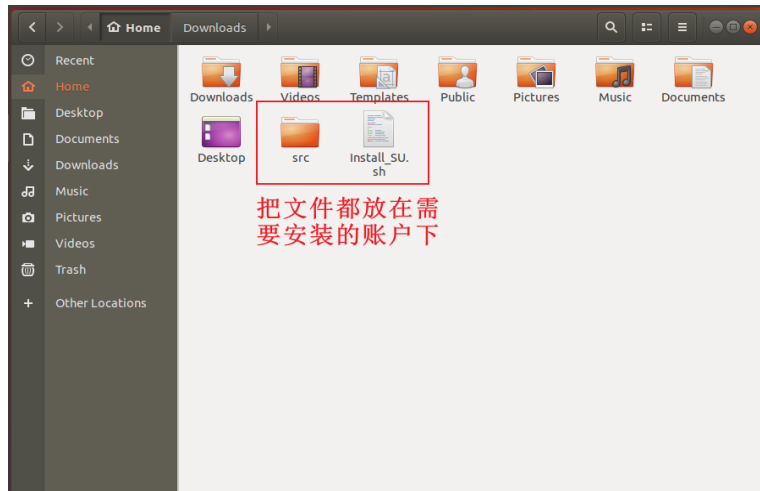

2. Extract the SU in the location as shown in the figure, and the *Install_SU.sh* in the same location.

3. Modify the script content. Replace the location shown below with your **account name**.

4. Open the terminal on the desktop and execute the following two commands:
   chmod -x Install_SU.sh
   ./Install_SU.sh
   Then, enter your password.

5. When the below figure is outputted, SU has been installed.
